Bacterial Membrane Modeling Kit©	 A photograph showing components of the Bacterial Membrane Modeling Kit. It includes a yellow lipid bilayer, a green integral membrane protein, and various blue and green headgroups. There are also small circular diagrams showing the assembly process.
Virus Infection & Immunity Modeling Kit©	 A photograph showing components of the Virus Infection & Immunity Modeling Kit. It features a yellow and purple virus-like particle (VLP) and a brown and purple antibody-like structure.
Lateral Flow & Diagnostics Kit©	 A photograph showing components of the Lateral Flow & Diagnostics Kit. It includes several small circular cards with different colored spots, a blue and green antibody-like structure, and a yellow and green lipid bilayer.
mRNA Vaccine Design Challenge©	 A photograph showing components of the mRNA Vaccine Design Challenge. It includes a Genetic Codon Circle, a SARS CoV-2 Spike protein, a mRNA Vaccine template, and a 3D model of a protein structure.
Antibody Diversity Kit©	 A photograph showing components of the Antibody Diversity Kit. It includes a red and yellow antibody-like structure, a yellow lipid bilayer, and a yellow and red antibody-like structure.
